December 26, 2014

Dear Steve:

On behalf of Omni Eye Services and Essex Specialized Surgical Institute (ESSI), I would like to thank you for the fine work Matilsky Construction just performed on two recent projects. In both cases you provided high quality work and did it on time and within budgetary expectations. For this we are very appreciative.

At Omni Eye you gave us several alternatives to enhance the carpeting within our operations area. You were direct in what you told us to expect as outcomes based on replacement versus repair. Once we decided on the repair, you were quick to complete the job and it has exceeded our expectations and pleased many people who see it on a daily basis.

At ESSI, the scope of work was more significant and the construction requirements were very stringent because of the need for various New Jersey approvals. This week we just received the final approval and the new room will be brought online in early January 2015. Again, you and your firm were instrumental in this success.

We look forward to continuing the relationship with you and feel fortunate to be among your clients.

Most Sincerely,

CC: [Faint text]
