To whom it may concern,

Matilsky Construction LLC has provided construction experience and services to our company EPCOS, Inc. on two separate building projects over the past 5 years.

In the 1st project Steve Matilsky coordinated a complete build-out for our newly acquired 18,000+ sqft office space. Through the close communications and coordination efforts of Steve, the project was completed ahead of schedule. Recognizing the exceptional quality of the workmanship Matilsky Construction LLC provided on our 1st project we were excited to work with Steve on our newest project, the expansion of an additional 4,700 sqft of office space. This time the project was to be conducted in a "live" workday environment and would require several phases of destruction and construction during the renovation. During this entire project, Steve's excellent coordination of his partnered sub-contractors insured our workday operations were not inconvenienced or interrupted.

It is without reservation that I offer testimony and recommendation to the quality of services provided by Matilsky Construction LLC.

I can be contacted for additional reference at your convenience
